## Shipping and Handling Charges

Your credit card is not charged until your order is ready to ship unless you use PayPal, then payment is made at the time the order is taken.

We charge \$2 per order above the cost of the items you purchased, this to cover the cost of shipping materials and the labor to pack the items only. Quite a bargain in today's world!

During your checkout selection of the "Method of Shipping", your information is taken directly to the USPS or UPS website where they calculate your country and address code, and calculate what their charges will be. The figure you see alongside includes our \$2 handling and the carrier's shipping cost.

**Shipping Carriers we use:**

1. **USPS** (United States Postal Service) National and International Service
2. **UPS** (United Parcel Service) National, Canada, and International service

## Purchase Protection and Product Guarantee

Your Initial purchases are backed up by an iron-clad, 30 day money back Purchase Protection Guarantee.

Your Initial 30 day Purchase Protection Guarantee gives you the option of exchanging or returning stock products for a full refund. If you are not completely satisfied, call our toll free number or E-mail us within 30 days of receipt of your product. Please note, refund does not include the original shipping charges and product should be complete and undamaged. **No restocking fees are charged.**

All products also carry a one year warrantee against defects in workmanship or materials.

That means besides your 30 day Purchase Protection Guarantee, our products carry a full one year warrantee from date of purchase.

## ” TOOLS FOR SCHOOLS ”

### COLOR CODED BLANKOUT

KEYBOARD

**KB-0158 \$49.95**

Typing tutor color coded keyboard can help you learn to type faster. These color-coded keys are arranged so that each finger is prompted towards its own distinct color keeping them from wandering over to incorrect keys. Learn good typing habits. Comes with a packet of original keycaps and a key puller so you can quickly change back to a conventional keyboard.

### TYPING BLANK KEYS

KEYBOARD

**KB-0157 \$44.95**

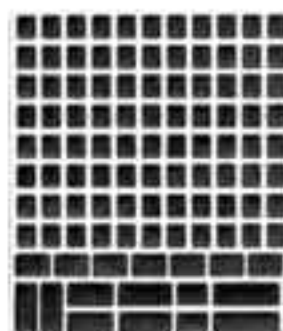

Often when teaching touch-typing the eyes will stray to the keyboard and ruin attempts to practice key placement memorization. Blank keys help you keep your mind on typing and your eyes off the keyboard. Comes with a packet of original keycaps and a key puller so you can quickly change back to a conventional keyboard.

You can trust Hooleon to deliver what you want, when you want it. Since 1983, Hooleon has been a leader in providing imaginative keyboard enhancements and training aids that save time, boost productivity, and help our customers maintain their competitive edge. We guarantee all of our products for one year from shipment date.

## Typing Tutor® users: learn to type faster with our supporting label kit.

Typing Tutor touch-typing software has helped many students master their way around the keyboard. Now Hooleon offers these wonderfully executed color coded labels to help teach the correct fingering while under the program's watchful supervision. The labels are arranged so that each finger of each hand finds the correct keys by being prompted toward its own distinct color group (For instance, the left hand's pinkie moves to black, while the index finger moves to yellow). This provides a visual check to make sure each finger isn't wandering over to incorrect keys as finger reach patterns are established. The package supports both upper and lower-case letters to take advantage of Typing Tutor's unique emphasis on upper and lower case exercises. Effortless to apply, these labels come with a special high-tack adhesive which allows easy removal when no longer needed. Perfect for both classroom and self-instruction, these unique typing aids provide that added incentive to help you keep up with critical drills, and move more quickly to higher levels of typing proficiency.

# Learn Typing Keyboards

Get on the FAST TRACK to (no peek) touch-typing!

- The Yikes!™ Computer Keyboard-to-Go Kit© is an amazingly simple, software-free program designed to show you how to break the hunt and peck typing habit in under 60 seconds! The Yikes!™ Computer Keyboard-to-Go Kit© puts you on the road to Keyboard Memorization!
- Plain and simple, The Yikes!™ Computer Keyboard-to-Go Kit© is all about keeping it simple. When used as designed, the kit saves you both time and energy by literally forcing you to break the addictive habit of looking down at the keyboard in search of information, or hunt and peck typing! In other words, the Yikes!™ Computer Keyboard-to-Go Kit makes it absolutely necessary for you to always position your fingers on the home row keys and keep your chin up-- the touch typists' "no fail" secret to success!
- The Yikes!™ Computer Keyboard-to-Go Kit© is not intended to replace typing lessons, courses, software or tutorials. Instead, it's designed to supplement and enhance these sources with keyboard knowledge otherwise found in scattered references, if at all.

## The Yikes!™ Computer Keyboard-To-Go Kit

Puts you on the road

Code OV-0748  
Price \$21.95

Break the hunt and peck typing habit in under 60 seconds. This Kit teaches you a simple yet effective method of remembering the location of each key and the finger responsible for striking it.

## Typing Large Print MyBoard III Keyboard

Kids will have a learning edge when identifying vowels, consonants and punctuation marks by the color and large print of each big key. And because command keys have been moved off to the side, their busy little hands won't accidentally hit computer function keys. The same size as a regular keyboard, the big keys and large print make this keyboard an essential learning tool for young kids.

Code: KB-081-0301  
Price: \$99.99

## Typing Keyboard Color Coded Blankout

Comes with the original set of printed keys and a keypuller, in the event you wish to return the keyboard back to normal.

Code: KB-0158  
Price: \$49.95

## LARGE PRINT KEYBOARD

**KB-0096 \$49.95**

**"Large Print Keyboard—Enhanced Visibility—Makes Viewing Easy"** With a legend that is two to four times larger than most. For typists with failing vision or those in low-light environments. The perfect solution for the visually impaired in this computer age. This is a full travel top of the line keyboard with a 1 year guarantee. PS2 connector.

**Magnify your keys' visibility with Large Print Labels.** These easy-to-apply labels increase the size of the normal keyboard's labeling by at least 100%. Perfect for users whose vision capabilities are changing or in low light situations. These labels stay securely in place, until intentionally removed. The full keyboard sets contain all of the labels needed for a standard Windows 104-key IBM compatible keyboard.

**Large Print (with windows) \$17.95**

- White Letters on Black OV-0415
- Black Letters on Ivory OV-0418
- Black Letters on Yellow OV-0646

**Now you have a clear choice for low vision workers.**

A perfect way to customize your computer keyboards for users with special visual requirements: our Braille/Large Print Combination Keyboard Label Kit. These durable, adhesive labels bring together both raised Braille characters and high visibility, large print key legends on the same label. The Braille/Large Print Combination Keyboard Label Kit also helps employers meet the reasonable accommodation requirements of the Americans With Disabilities Act. By combining the familiar keyboard letters with the touch/feel of Braille characters over time, people with failing vision can be offered an efficient way to learn this critical new reading method. The full keyboard sets contain all of the labels needed for a standard Windows 104-key IBM compatible keyboard.

**Braille/Large Print Windows Label Kit**

- White Letters On Black OV-0654 \$19.95
- Black Letters On Ivory OV-0655 \$19.95
- Black Letters On Yellow OV-0656 \$19.95

## BRaille READY KEYBOARD

**The perfect solution for the visually impaired in the computer age** comes in Hooleon's Braille Ready Keyboard. This 104 key keyboard assists the visually impaired keyboard operator by providing the raised Braille equivalents for the legends of 101 keys. PS2 or USB connections available. 1 year guarantee.

**Braille Ready Keyboard**

- PS2 Connection KB-0164 \$64.95
- USB Connection KB-0164-U \$64.95

## An easy way to put the necessary Braille characters at your non-sighted users' fingertips.

Add Braille to any keyboard with these transparent Braille Labels for the alpha/numeric keypad. Sighted and non-sighted users alike will then be able to use the keyboard via these durable transparent labels. Labels will stay in place, without slipping or sliding, until intentionally removed. The kit also includes labels with extra bumps for use as key finders for other keys on the keyboard such as function and command keys.

*Braille Labels*

Although blindness can be a sudden event for many, others who experience vision loss find it's a year-by-year journey into darkness. Diabetes, cardiovascular disease and retinal disorders are the leading causes of vision loss and blindness in the U.S. today. By combining the familiar keyboard letters with the touch/feel of Braille characters over time, adults with failing vision can be offered an efficient way to learn this critical new reading method.

## Now you have a clear choice for low vision workers.

At last, a perfect way to customize your computer keyboards for users with special visual requirements: our Braille/Large Print Combination Keyboard Label Kit. These durable, adhesive labels bring together both raised Braille characters and high-visibility, large print key faces on the same label. Excellent as a Braille teaching tool for those with progressive vision loss, the Braille/Large Print Combination Keyboard Label Kit also helps employers meet the reasonable accommodation requirements of the new Americans With Disabilities Act. An added plus: the kit is designed not to interfere with anyone else using the keyboard.

If you know someone who needs to use a computer, but has lost the use of one typing hand due to a stroke, accident or other physical restriction, here's an idea: consider a Dvorak style keyboard layout, configured for one-hand typing. With practice, many of these left-or right-handed typists can achieve competent typing speeds. Most popular word processing and all key reassignment programs allow keys to be "reassigned" in this manner. To complete the package, many of our products can be used for re-labeling the actual key.

## DVORAK CONVERSION LABELS

## Untangle your fingers a bit! Change to an alternate keyboard layout with our Dvorak Conversion Labels.

It won't surprise carpal tunnel sufferers that the QWERTY key arrangement was designed in 1873 to get in the way of typists!

(Mechanical typewriter key levers were prone to jamming and needed time to fall back down.) Many experts believe that the standard American National Standards Institute (ANSI) X4.22 Dvorak keyboard configuration is one answer to making today's higher speed electronic typing easier. With Hooleon Dvorak Conversion Labels, you get dual use of the keyboard: the Dvorak legend is prominent in the upper-left corner and the red QWERTY legend is small in the lower right, allowing QWERTY typists to use the keyboard as well. The kit includes options for various brackets and symbols whose placement may vary depending on conversion software used. These durable, color-matched labels blend in well with keys.

*Dvorak Conversion Labels*

*The Dvorak ANSI  
X4.22 Keyboard  
Layout*

**Hooleon**  
CORPORATION

**C.A.L.L 1 (800) 937-1337**

**F.A.X 1 (505) 253-4299**

## You'll never have to say "Don't Ever Touch That Key!" with KeyStoppers™.

Don't resort to expensive reprogramming where user key restrictions need to be applied. KeyStopper Key Lock-Outs can save you from:

- Data losses from rapid-fire deleting
- Incorrect command entry from lower level users
- Wrong key presses at public-use terminals
- All situations where only certain keys should remain operational

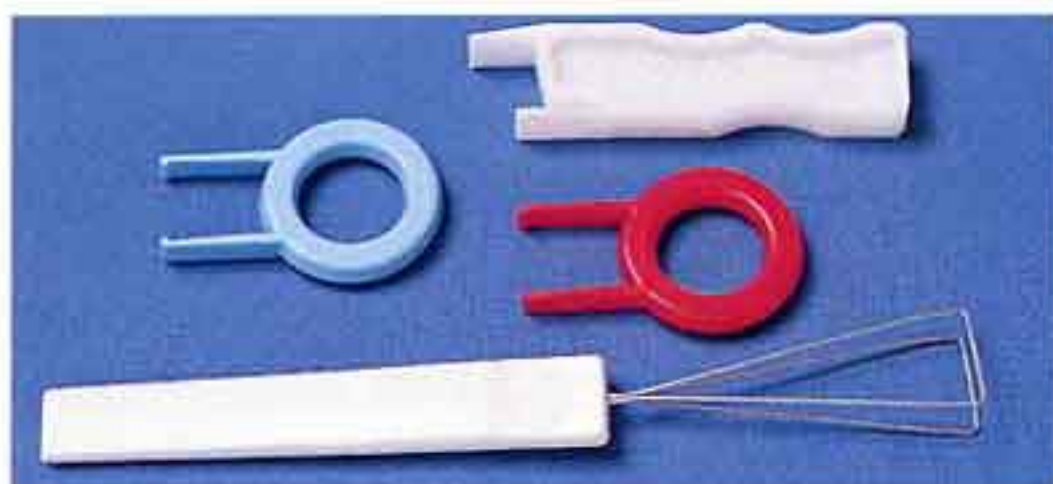

*KeyStopper Key Lock-Outs*

KeyStopper gives you the choice - you can completely disable a key using a "hard" lock or you can increase keystroke resistance with a "soft" lock to provide a warning to the operator.

## To swap keys, first you have to get them off - who else would have three ways to do it?

If you don't already have one, you'll need a Key Puller to swap keys and key-caps. The IBM-brand Keyboard Tool (top) is designed for IBM-brand keyboards. The Hooleon Universal Key Puller (bottom) uses a specially designed flexible metal wire to lift any size or style key from most make/model keyboards. The Ring Type Key Pullers (center) are plastic versions of our Universal Key Puller and work well on most makes and models.

*Key Pullers*

## Be it ever so humble, there's no place like the home-row - find it fast with home-row indicators.

Prized by touch typists, our Home-Row Key Indicator Labels tell you when you're back "home" instantly. That's especially handy for today's computer users whose hands must shuffle back and forth between function keys, numeric keypad, mouse and other obstacles to finding the correct place on the keyboard quickly and accurately. Made of the same durable adhesive backed plastic as our Braille labels, these useful typing aids stay put until you decide you want to remove them.

*Home-Row Key Indicators*

**HOME-ROW  
KEY INDICATOR**

## Make your own command prompts with a Do-It-Yourself Template.

You are the template designer with these wipe-clean templates, so use them for whatever you need a template to say. And as the software changes, erase and change the template to match. Made of die-cut durable material, these can be handy for macros, personally configured software, reminders about key functions - even teaching tools. Perfect for students who like to write down each function as they learn it! And since they are an easy-to-remove template, you can have one for each package you are using. In fact, you can keep the whole bunch stacked right on your keyboard and simply flip

to the right one as needed. Need more room? The standard 12-function key and IBM 3270 styles are totally reversible. Just flip one over and write on the other side.

# Keyboard Tools and Maintenance

**With these Touchdown™ Key-tops you can create your own adhesive key-top labels to put the commands you need on the keys.**

This kit allows you to put new legends on your key-tops and key-fronts so you can color-code and rename the keys. Complete directions are included in each kit.

Design your keyboard "Do-It-Yourself" Label Kit.

Code: OV-0576  
Price: \$19.95

## Keyboard Replacement Label Sticker Kit (black on Ivory)

Restores the faces of your worn out keys.

*U.S.  
Standard  
Alpha/  
Numeric  
Replacement  
Labels*

Code: OV-0382  
Price: \$17.95

## Worn keys? Here's the answer!

There are times when the tops of the keys wear out long before the rest of the keyboard, particularly in harsh use environments like factories, point-of-sale, telemarketing, reservations and similar high traffic computer-based businesses. If so, try our U.S. Standard Alpha/Numeric Replacement Labels. The kit includes all of the common legends required for a standard 104-key IBM style keyboard. They are imprinted from the back to prevent character rub-off, and they feature a high-tack adhesive that stays put, but can be removed without damaging the keyboard.

**Hooleon**  
CORPORATION

**CALL 1 (800) 937-1337**

**FAX 1 (505) 253-4299**

Create a "super template" by placing any of our label products on top of our FlexShield to slip software commands right onto the keys. This is a great way to combine necessary keyboard protection with being a teaching tool - an easy reminder when it's time to use a particular macro set, or link-up to a mainframe for some specialized tasks.

## Defend against spills and grit with a FlexShield™ Keyboard Protector.

Take a computer equivalent of the "strategic defense initiative" and protect your keyboard from old enemies, including cigarette ashes, coffee, soft drinks, paper clips, staples, greasy fingers, food, glue, and more! Our high-quality polyurethane FlexShield can repel hazards while still allowing full use of the keyboard. And when mishaps occur, just wipe the mess away and wash it with warm soapy water! There are approximately 2000 different FlexShield designs to choose from - each made exactly to fit a keyboard make or model. With our highly flexible material base, you'll find that every key is just as easy to use as ever, without any restriction or interference from the membrane on neighboring keys. Whether you use Apple®, Hewlett-Packard®, Key Tronic®, Tandy®, Zenith®, or any other computer or keyboard brand, give us a call and give your keyboard some protection.

### FLEXSHIELD KEYBOARD PROTECTOR

(Ordering Hint: FlexShields are not interchangeable.)

### Need even more protection than FlexShield?

For environments where an "umbrella" isn't protection enough, you might want to consider a Membrane keyboard. And to protect a custom keyboard, cash register, phone pad, or any other electronically keyed device, call for information about custom FlexShields.

*FlexShield Keyboard Protector*

## "The Leader in Keytop Innovations"™

### FLEXSHIELD

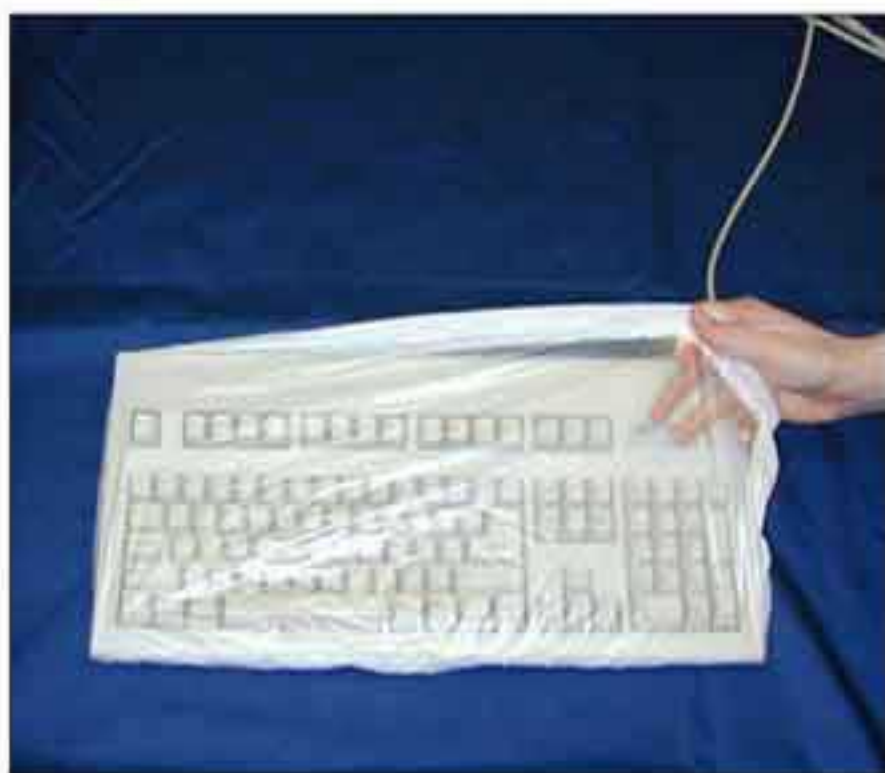

One "minor" accident can cause major problems. Put a shield of protection on your keyboard with a Hooleon Flexshield. Keyboard Protector Flexshield Skins are made of a highly flexible, yet durable plastic membrane that is vacuum formed to fit exactly to your particular keyboard without sacrificing keyboard feel or sensitivity. Each Flexshield is transparent to allow easy recognition of all key legends yet has a matte finish to reduce glare. In the performance of it's duties your Flexshield may become contaminated with, among other things, cigarette ashes, soft drink spills, coffee, dust and dirt. Washing with warm soapy water makes cleanup a snap.

PROTECTION SKIN

**\$12.95 PER FLEXSHIELD ( QUANTITY DISCOUNTS AVAILABLE )**

### DISPOSABLE

PROTECTION SKIN

- Easy to install & remove.
- Sewn edges.
- Elastic secures the disposable skin to the keyboard
- Great in hospitals, laboratories, dental offices, and food processing plants where all items must be disposable for contamination control.
- Constructed of ultra strong durable .002 matte finish polyurethane material.

**\$6.95 PER DISPOSABLE SKIN ( QUANTITY DISCOUNTS AVAILABLE )**

*You can trust Hooleon to deliver what you want, when you want it.*

Since 1983, Hooleon has been a leader in providing imaginative keyboard enhancements and training aids that save time, boost productivity, and help our customers maintain their competitive edge. Whether you are an information system manager, system designer, value-added reseller, or PC owner, Hooleon is dedicated to prompt, courteous service and complete customer satisfaction. We're looking forward to meeting your keyboard enhancement needs.

Hooleon Corporation

Melrose, NM 88124  
Voice: (800) 937-1337  
Fax: (505) 253-4299  
Internet: [www.hooleon.com](http://www.hooleon.com)

## Tired of looking up that second language? Try our bilingual keyboards instead.

These top-quality bilingual keyboards eliminate confusion when you need to operate in a language other than English.

They are ideal to use with foreign language word processing programs and English-based word processors configured for

other language character sets. These keyboards eliminate the need to use templates, key labels or replacement keys to provide key conversions. All keyboards are PC/AT/XT compatible and feature both English and the alternate language legends clearly imprinted on the keys. Foreign language character sets are rendered in the most common typography conventions within the language group. The non-click keys are responsive and soothing to the touch during long typing sessions.

### FEATURES INCLUDE:

- 104-key layout
- IBM PC/XT/AT PS/2 compatible and USB
- Mechanical linear non-click key switch with 50 million operations of key life
- LED indicator for NUM lock, CAPS lock and Scroll lock
- Auto-repeat
- Network compatible
- Two-level stand for increased comfort

## Conversion labels let your own keyboard "speak" a second language.

Now you can convert your English keyboard to "speak" your choice of additional languages. With these conversion labels, you get all the correct characters, diacritical marks, accented vowels and punctuation symbols you need - while still being able to use the keyboard of your choice. The transparent second language characters are positioned so you can still see the original language character underneath. Hooleon Language Conversion Label Kits are based on the DOS character set configurations you will see on the screen or printed page as recommended by Microsoft Corp. and IBM (or by the prevailing standards for the individual language or alphabet). The label kits fit IBM and most look-alike styles of keyboards.

*Cyrillic Label Kit*

### Need other languages? Go custom!

If you need a special language group or character set that isn't represented by any of our standard products, there is a cost-effective alternative: custom imprinted keyboards, labels, or imprinted key sets can be made to your specifications for any language or combinations of languages.

Lighten the load on staff translators by using whole document translation software to provide "first-pass" translations. When their task is merely to edit and enhance the "machine" translation, human translators are more productive, and the resulting documents benefit from the added attention. If you have documents or sections of documents that often need translation, try linking translation software with a keyboard macro program to automatically translate and form text blocks correctly in that second language.

# Data Entry Point Of Sale Terminal Keyboards

## Let your PC save you money with our 5250, 5291, and 3270 Emulation Label Kits.

Why hunt, peck and fumble with manuals, cue cards or homemade templates when you could sail through emulation tasks? Make your PC keyboard feel at home on your midrange computer with these Hooleon transparent label kits. Our labels are designed to take the confusion out of emulation by adding color-coded important emulation commands to your keys, while still allowing the original key characters to shine through. These kits support a range of keyboard configurations, depending on the brand of terminal emulation software.

3270 Version 3 for EPC

5250 and 5291 Style Emulation Labels

### Ordering Hint:

For best results, first consult your operating manual and then call us so a service representative can assist you in ordering. An easy way to choose which kit you need is to determine what commands should appear on the F1 key. If F1 should say "System Request" and "Attention," order the 5291 style kit. If the F1 legend should be "CMD 1 and CMD 13" or "CMD 1, CMD 11 and CMD 21," order the PC/AT style kit.

**5250 AND 5291 STYLE EMULATION KIT** #223-312-0269

*Note: Call for AS400 availability*

**Hooleon**  
CORPORATION

If you require other types of terminal emulations, why not design your own templates, labels or keys to get true "dual use" utility out of your personal computer terminal emulations? This simple keyboard modification can pay back over and over again - particularly for far flung users who can't be as easily trained on host operations. Your users will particularly appreciate customizing their keys to switch back and forth between emulation and standard PC operations

**PC AND AT STYLE 5250 EMULATION KIT** #223-312-0266

**IDEACOMM™ 5250 EMULATION KIT** #223-312-0303

**IBM 3270 VERS. 3.0 EMULATION KIT** #223-312-0275  
(for 12 F-Key Keyboards)

## Renaming key functions with Pop-Up keys is as easy as 1-2-3.

Pop-Up keys are perfect for any situation where key functions change frequently. From keyboards used for point-of-sale to those used for inventory control and remembering macros, this re-labeling method is the easiest. First, simply snap off the clear cap,

*Pop-Up Keys*

simply snap the lid back on. Color coding Pop-Ups is easy too with Hooleon Die Cut Paper. The Pop-Up's large format design even allows you to label key fronts! These convenient two-part keys are available for Cherry®, Wyse® and KeyTronic® style of key bases, but we can also custom-make relegendable keys to your brand's specifications.

### Removable Snap on Key-tops

Relegendable Keys are the perfect solution for any situation (such as point-of-sale) cash registers where key functions change frequently. By removing the clear plastic cap you can change the legend to whatever fits your current needs. You can even color-code with our specially die-cut paper that provides labeling areas on the top and front of the key.

### Ordering Hint:

Because the shape and size of each key varies from row to row on different brands of keyboards, call us before ordering. A sales representative will work with you to assure you get the correct keys. Check the accompanying key base photographs to determine which brand you need.

## Put those scissors away, and order perfect fitting die-cut replacement papers for your Pop-Up keys.

When it's time to change your Pop-Up keys, use the original die-cut paper designed specifically for the job. Doing so will mean a perfect fit for keys that won't interfere with key operation, and will leave you with a professional looking job. Do-It-Yourself Die-Cut Paper blanks are designed to provide areas for both top and front imprints. They fit both the IBM-supporting SnapCaps and Pop-Up keys for Cherry, Wyse and KeyTronic keyboard style key bases.

### Quantity keyboard modifications? Call for a quote on custom keys!

If you have a quantity of keyboards which could use color coding, consider calling for a quote on custom key sets. It is surprisingly cost-effective to use custom keys - especially when the time saved in training costs is considered.

## Why turn to Hooleon for your custom products?

There are special offers you can take advantage of as a custom products client of Hooleon!

Like the number of keyboard brands supported. We stock a large selection of key brands and styles, or quickly manufacture them on an as-needed basis providing fast turnaround.

With Hooleon, your choices are virtually unlimited. Need a particular color of key? Hooleon stocks a rainbow of key colors. Plus, we have the capability to do custom color matching! Want a particular logo or custom symbol? We can render it for you or work from your graphics files or camera-ready artwork. Add to that our extensive type library that includes characters and symbols in English and numerous other languages, plus mathematical and scientific symbols, and you can see that the possibilities are wide open. And we work at all levels, from providing single keys that quickly replace the standard keys on your keyboard, all the way to providing complete keyboards fully populated with custom keys.

*Custom Labels*

### Our most popular supported keyboard brands include:

- Alps®
- Apple®
- AT&T®
- Cherry®
- Compaq®
- DEC®
- Fujitsu®
- Hewlett-Packard®
- Hi-Tek®
- Honeywell®
- IBM®
- KeyTronic®
- Macintosh®
- Maxiswitch®
- Se·Jin®
- Wyse®

*Note: Many other brands also supported*

## Custom Keyboards, Keys, Labels, and Templates

**Ready to order?  
Ask for our rough art  
kit.**

Our rough art kit can help you design your own custom keyboard, and get you an accurate cost estimate back from us. The art kit includes:

- Samples of the correct keyboard layout that you can fill in, key by key, to show us which types of keys you need and the appropriate labels on each
- A brief questionnaire with other ordering information on it (see the sample rough art diagram below for an idea of what we'll be asking you)

# Performance manufacturing: The key to great keyboard products.

And we have the manufacturing processes that allow us to do it all, including the most commonly accepted key imprinting processes, such as die sublimation and epoxy printing (using our own proprietary ink formulations). We also offer double-shot molding of keys and a complete engineering and CAD drafting service for special molding and tooling.

**Note:** Because of variations in tooling specifications and key colors within any brand name of keyboard, it is important that you send us a complete keyboard to ensure our custom imprinted keys will properly fit your keyboard.

## When standard just won't do, there are some very good reasons for going custom.

*Custom Key Imprinting*

### VARs and Systems Integrators: Give yourself a competitive advantage.

In these days of price competition and flourishing direct sales operations, wouldn't it be nice to be able to offer something unique? Something simple, obvious and compelling? Something visibly different and instantly useful? Next time your customer asks "Why should I go through you?" show them something they can't get anywhere else: Keyboards customized by you exactly for their software, their terminology, their uses and their needs!

Hooleon sells a lot of keyboard enhancement products, but the most requested of them all are our custom keys, labels and templates. Know why? Here's what our customers tell us:

Users are more productive, more quickly with keyboards that have been customized to meet their specific needs. This is because of:

- faster command recall
- greater synchronization of keyboard and screen activities
- prioritization of the most important commands

Managers, programmers, and systems analysts say their training budgets are often reduced when upgrading software and/or hardware. Plus, they say user acceptance is greater and more of their time is spent on higher order tasks instead of answering baseline queries from users.

### A value to VARs (Value Added Resellers)

VARs, VADs and systems integrators appreciate the value customized keyboards can add for their customers. By providing software-specific keyboards that reflect the key functions the software performs, these resellers increase their perceived and actual "value added!"

**Hooleon**  
CORPORATION

## Make your own command prompts with a Do-It-Yourself Template.

You are the template designer with these wipe-clean templates, so use them for whatever you need a template to say. And as the software changes, erase and change the template to match. Made of die-cut durable material, these can be handy for macros, personally configured software, reminders about key functions - even teaching tools. Perfect for students who like to write down each function as they learn it! And since they are an easy-to-remove template, you can have one for each package you are using. In fact, you can keep the whole bunch stacked right on your keyboard and simply flip

to the right one as needed. Need more room? The standard 12-function key and IBM 3270 styles are totally reversible. Just flip one over and write on the other side.

## SPECIALTY KEYBOARDS AND KEYPADS

**Teach your system to spell F-L-E-X-I-B-I-L-I-T-Y  
with one of our add-on or point-of-sale keyboards.**

For every macro user who runs out of key combinations, for every laptop number cruncher who longs for a portable keypad, for every point-of-sale terminal buyer wishing they had more flexibility, and for many others who wish to expand their input options, Hooleon's specialty keyboards provide the answers. Depending upon the model you choose, you can get feature sets not offered elsewhere like:

- Connection via serial, parallel or keyboard ports
- Key reassignment
- Keyboard macros
- Compatibility with extended ASCII character sets
- Laser printer-based software for key relegending
- Keyboard protection with our custom FlexShield™ protectors
